## 1. Introduction

Indian National Centre for Ocean Information Services (ESSO\_INCOIS), a unit of Ministry of Earth Sciences, Govt. of India is a premier scientific Institute of the country, functioning on 24x7 basis to provide Ocean data, information and advisory services to society, industry, Government and Scientific community through sustained ocean observation and constant improvement through systematic and focused researching information and Ocean modelling.

INCOIS had planned to establish a real-time GNSS and Strong Motion Accelerometer (SMA) network at 35 locations in Andaman & Nicobar (A & N) Islands to improve the timeliness and accuracies of earthquake detection and tsunami early warnings. Out of the 35 locations, construction of recording room of size approx. 3x3 m with compound wall of size approx. 10x10 m for the installation of GNSS and Strong Motion Accelerometers (SMAs) network is completed and being maintained at 32 locations. The observatories are equipped with a suite of sensors such as Strong Motion Accelerometer with digital recorders, solar power systems, battery chargers, GNSS receivers with antennas, met packages and relevant solar power system, charge controller, lightening and surge protection etc. These stations are also equipped with VSAT antennas for real-time data transmission. The data collected is used for various operational and research activities of INCOIS including earthquake detection and tsunami early warning services and other scientific studies. Under this tender INCOIS intends to get the civil repair, rectification and maintenance works like painting, filling up of cracks, masonry repair works for the compound & recording room walls, arresting of water seepages, repair/replacement of cracks / doors / windows / locks, site cleaning and other related works as detailed further in the tender document for all of the 32 no's stations at Andaman & Nicobar Islands. Hence, it is highly recommended that bidders should visit the sites and get familiarize themselves with the works before submission of the bid and also, considering the real-time data for various operational and research activities particularly earthquake detection and tsunami early warning services, it is highly essential to take utmost care of all sensitive sensor and accessories while performing the civil repair and painting works.

## 2. Scope of the Work:

- The scope of work includes civil repair, rectification and maintenance works like painting, filling up of cracks, masonry repair works for the compound & room walls, arresting of water seepages in the pier, repair/replacement of doors / windows / locks, site cleaning and other related works and upkeep of the observatory.
