WORKSHOP ON SATELLITE DATA HELD IN CITY

DC CORRESPONDENT
HYDERABAD, AUG. 6

Dr Shailesh Nayak, director of National Institute of Advanced Studies, Bengaluru, highlighted the importance of satellite data for monitoring earth and ocean systems and emphasising the need for continuous data availability, at a workshop organised by the the Indian National Centre for Ocean Information Services (Incois) here.

The event was held in the run-up to the National Space Day on August 23. Inaugurating the workshop, 'Applications of Space Technology for Earth System', Dr M. Ravichandran, secretary, ministry of earth sciences, discussed the advancements in remote sensing and stressing the development of the blue economy mission.
