

CORRIGENDUM -1

For

Pre-NIT Market Consultation for Supply & Commissioning of a Humanoid Robot (1 Unit)

GeM No. GEM/2026/B/7983220

1. Clarification regarding the purpose of the GeM publication

The above GeM publication is intended only to facilitate a Pre-NIT Market Consultation for the proposed Supply & Commissioning of one Humanoid Robot. The purpose of this exercise is to obtain market input on availability, technological maturity, technical feasibility, capabilities, and practical implementation of state-of-the-art humanoid robotic solutions, to enable INCOIS to refine and finalise detailed technical requirements and the subsequent RFP/tender document.

2. Use of the GeM Bid platform

The use of the GeM Bid platform for this exercise is to facilitate the Pre-NIT Market Consultation, as the GeM platform does not provide a separate procurement category or function for it. Accordingly, bid-related fields or terminology appearing in the GeM-generated document/platform are to be understood in the context of this Pre-NIT Market Consultation and shall not be interpreted as an invitation to submit a price bid or as part of the procurement award process at this stage.

3. Information/response expected from prospective vendors

Prospective vendors are requested to use the GeM bid response facility to indicate their willingness to participate and to submit relevant observations, concerns, comments and suggestions regarding the indicative technical/functional requirements of INCOIS. Vendors may also indicate whether currently available or state-of-the-art technologies and solutions can broadly address the envisaged requirements and highlight any significant technical, functional or implementation constraints.

4. No detailed technical or financial bids required at this stage

Vendors are NOT required to submit detailed technical bids, detailed technical compliance statements, detailed product-wise specifications or financial/price bids at this stage. The information submitted shall be treated as indicative, non-binding market feedback to understand market availability and refine the requirements.

5. Proposed interactive technical session

Based on the responses/willingness received through GeM, INCOIS will consolidate the interested/willing vendors and conduct a one-day interactive technical session. Vendors will be invited to present their state-of-the-art humanoid robotic technologies, capabilities, possible approaches/solutions, technical limitations and implementation considerations relevant to the requirements envisaged by INCOIS. The input obtained during the session will be used to refine further and finalize the technical requirements and to prepare the subsequent RFP/tender document.

6. Extension of response date

The response End Date/Time is hereby extended as follows:

As per Pre-NIT Document	22.09.2026 / 17:00 Hrs
Revised	29.09.2026 / 17:00 Hrs

7. General

This Pre-NIT Market Consultation is for market assessment and technical interaction only. Participation in or submission of market input shall not confer any right or claim to the award of any future procurement. All other provisions of the GeM publication remain unchanged, except to the extent specifically clarified through this Corrigendum.
